

Progression of Toxicity

Degrees of Impregnation/Degradation (Functional Capacity of Systems is Exceeded)

Allan A. Harris ND, LAc
Circle of Health Clinic

The things listed below all contribute to the above process in their own specific ways, and typically need to be addressed in the treatment of chronic problems

- Stress**
- Imbalance of nervous system
 - Imbalance of hormonal system

- Nutritional Deficiencies**
- Minerals
 - Vitamins
 - Essential fats
 - Enzymes

Compromised blood flow

Hidden, chronic infection

- Environmental Toxins:**
- Heavy Metals
 - Pesticides
 - Solvents
 - Hormone "Mimickers"
 - Many other environmental toxins
